

Year 1 and 2 Topic Project Homework – Autumn 1

Body

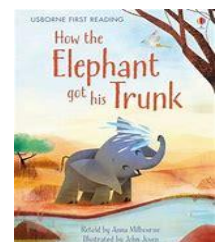

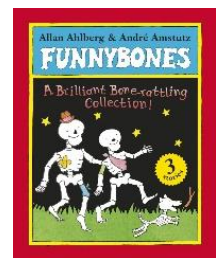

This half term's topic is 'Body'. We will carry out investigations using our senses and explore how our bodies move. We will learn how to stay safe around medicines and write stories linked to our topic.

Your homework project is your opportunity to do your own learning linked to this topic in a way that interests you. We would love you to be as creative as possible to show us what you found out.

Here are some ideas:

- Create a piece of art using different parts of your body. Can your friends guess how you made it?
- Visit your local library or look online and see if you can find any books about bodies. Can you compare human and animal bodies?
- Write a body quiz to share with your class.
- Design and make a maths game inspired by the book series Funnybones.
- Learn a song or poem about your body and teach it to your friends. Can you add any actions?
- Use a computer to draw a picture of a body part or a skeleton.
- Design and create a brand new animal. What is different about it? You could use Lego, junk modelling or your own fantastic ideas.
- Look on the internet at home or at the library with a grown up to find and record some facts about your body. Present them in your own way.
- Find and read a story inspired by bodies. Share a review of your story with your class.
- Test your senses and tell your class all about it. How many different sounds did you hear on the way to school? Did you taste anything new?

Or choose your own idea. Remember to involve your adults and ask them what they know about the body. Try the following websites to help you.

- <https://www.bbc.com/education/topics/z9yycdm>
- [The parts of the body | TheSchoolRun](#)

Your projects are welcome any day of the term. Aim to complete them and bring them in by **Friday 1st October** so we can share them in class.
